INDEX

1	FIXES	3
2	ENHANCEMENTS	6
3	USER MANUALS	8

1 Fixes

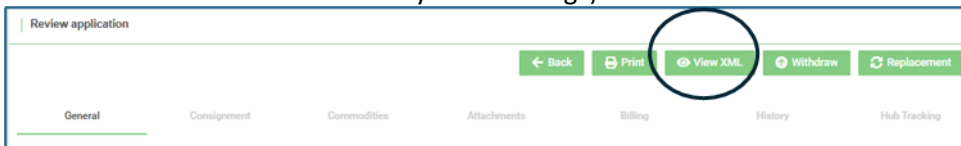

Reference	Description									
IGN-3292	[Re-export type] Changes to "Contracting party of origin" should be reflected. Steps: - As NPPO Assistant or Company User create a CR for Re-export - Create a new commodity line and scroll down to "Contracting party of origin" to select multiple countries (e.g. Zambia, Spain, France) - Save your line - Reopen the same line. Correct: the multiple countries are still selected and visible. - Now, add or remove a country (e.g. keep Spain and France, remove Zambia and add Germany selected). Save and close the line - Reopen the same line. Latest changes should be reflected.									
IGN-3314	[PANAMA and MADAGASCAR USER FEEDBACK] Countries reporting conversion date issue on Replacement date. The Time Zone in the XML should reflect the configuration in System Settings. Steps: - As NPPO Admin go to Administration - Then, System Settings - Check your Time Zone, e.g. Pacific/Kiritimati which is UTC+14:00 System Settings NPPO Settings Email Settings Help Text PDF Template Search: time zone <table><thead><tr><th>Setting</th><th>Value</th><th>Description</th></tr></thead><tbody><tr><td>→ Show both inspection date and time...</td><td>Enabled</td><td>Select this flag</td></tr><tr><td>→ Time Zone</td><td>Pacific/Kiritimati</td><td>Time Zone</td></tr></tbody></table> - Now, create, issue and replace a PC - Open the newly ISSUED PC and click "View XML" (enable the configuration from System Settings if not displayed). - In the XML the ADRD (replacement date) should be showing midnight time along with the Time Zone configured in the System Settings. <pre><IncludedSPSNote> <Subject>ADRD</Subject> <Content languageID="en">2024-11-07T00:00:00+14:00</Content> </IncludedSPSNote></pre>	Setting	Value	Description	→ Show both inspection date and time...	Enabled	Select this flag	→ Time Zone	Pacific/Kiritimati	Time Zone
Setting	Value	Description								
→ Show both inspection date and time...	Enabled	Select this flag								
→ Time Zone	Pacific/Kiritimati	Time Zone								
IGN-3318	[SRI LANKA USER FEEDBACK] "No element found" error message should not come up. Steps to reproduce: - Copy any certificate that has already a commodity line. - Then click "Commodities" tab (do not open the commodity line). - Then, click "Submit" - You should not get an error message on the "Country of origin" missing. - Doble click the commodity line to open it - The "No element found" message should not be displayed.									
IGN-3319	[ISRAEL USER FEEDBACK] Changes to treatment should be saved. Steps: - As NPPO Assistant or Company User create a Certificate Request - Add a commodity and include a treatment									

	- Save the line - Double click the line to edit the commodity - Scroll down to edit the treatment - Amend treatment information and click “Confirm” then “Save” - Reopen the commodity line - The amendments on the treatment should be reflected
IGN-3330	[MADAGASCAR User Feedback] "Find an issued certificates" functionality on login should be working even if there is an extra blank space. Steps: - As NPPO Admin log in and make sure this configuration is enabled under Administration > System Settings → “Enable the public search of Phytosanitary Certificates on login page” - Open a PC that has been issued (status can be ISSUED, REPLACED or WITHDRAWN) - Click “Print” to download the PDF and copy its PC number, place of issue and issue date. - Then, log out. - On login page click “Find an issued certificate” - Type Certificate Number, Place of Issue and select the Date of issue. - Check the reCAPTCHA box, then “Search” - The PC should be available for downloading. 
IGN-3331 & IGN-3370	[ISRAEL & GUATEMALA User feedback] Transport details should not disappear. Scenario 1 - Steps: - Log in as NPPO Assistant or Company User - Create a Certificate Request (CR) for Export or Re-export - Add Means of transport in the “Consignment” tab - Add the commodity line - Go to “Attachment” tab and add a file under and over 3 MB

	- Go back to “Consignment” tab and submit the CR to the NPPO Inspector - Log in as NPPO Inspector and verify that transport details are still displayed. Scenario 2 – Steps: - Log in as NPPO Assistant or Company User - Copy a Certificate request (CR) including Transport details - Go to the “Attachment” tab and add a file under and over 3 MB - Go back to “Consignment” tab and verify that transport details are still displayed. Scenario 3 – Steps: - Log in as NPPO Assistant or Company User - Either create a Certificate Request (CR) with transport details or copy one including Transport details - Go to the “Attachment” tab - Add a file, then remove it - Go back to “Consignment” tab and verify that transport details are still displayed.
IGN-3332	[Replacement] Align the Issue Date in the XML and printout Requirements: - The NPPO Assistant or Company User raising the replacement request, can select any Date of replacement. However, by default the Replacement Date should be the issued date of the potential replaced certificate. - The NPPO Officer who receives the Replacement Request can select any issue date. This selected date will be displayed on the printout and as issue date in the XML. - The ADRD (replacement date) in the XML will be kept as the issued date of the replaced certificate despite the selection of the NPPO Assistant or Company User.
IGN-3359	User should not lose Country of origin and location on any Certificate copy Steps: - Look for any certificate with a commodity line. - Then, copy this certificate - Double click the commodity line - then, click “Submit” - At this stage there should not be any error message, and the Country of origin should be visible. 
IGN-3360	User should not lose Country of origin and Contracting party of origin on Re-export certificates from Import. Steps: - Go to the Import folder > Received - Re-export a certificate - Add the mandatory info (importing country, applicant name if applicable, exporter and consignee). - Click “Submit” - At this stage there should not be any error message, and the “Country of origin” and “Contracting party of origin” should be visible.

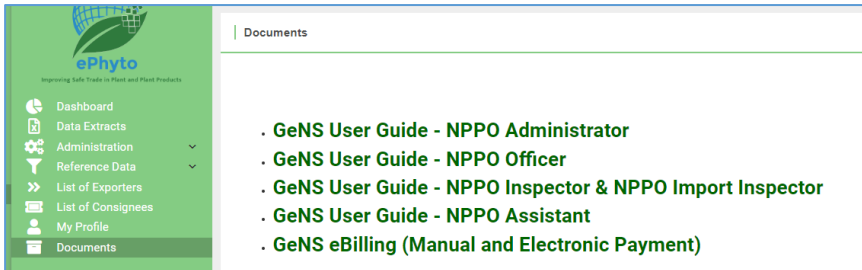

IGN-3363	[ISRAEL USER FEEDBACK] Allow to type max. 255 characters including spaces as “Additional Information” on the Treatment section within the commodity line.
IGN-3364	"An error occurred during certificate evaluation" and "Packaging is missing" should not appear. Steps: - Create a CR with 3 commodities. - on the first commodity select some packages (e.g 2 bags, 2 boxes) - on the second commodity select “In bulk” as package - on the third commodity select the Free text option - Copy the certificate and the new draft will be displayed - Click the “Submit” button - No error message should be displayed
IGN-3369	Keep the Packaging information when re-exporting Steps: - Go to “Import certificates” - Then, “Received” or “Processed” or “Country responses” - Choose a PC that includes packages (e.g. 20 bags) - Click “Re-export” - Select the mandatory info in the “General” tab of the new draft - Click “Commodities” tab - Open the Commodity line - Always show the packaging information of the original certificate.
IGN-3382 (Already in PROD)	[ISRAEL USER FEEDBACK] Enhancement on slow performance

2 Enhancements

Reference	Description
IGN-3030	[SRI LANKA USER FEEDBACK] Show the inspection date and time on the printout again through a configuration. How to access the configuration: - Log in as NPPO Admin - Click “System Settings” - Search for the configuration named “Show both inspection date and time on the PDF printout” - Check the box to enable or uncheck the box to disable the configuration - Save your changes and refresh the web page.
IGN-3046	[ISRAEL User Feedback] The Data extract should show the “Place of Origin” information.
IGN-3047	[ISRAEL User Feedback] In the Data Extract show Re-export info in the following columns: - CONTRACTINGPARTYOFORIGIN - REFERENCE
IGN-3068 (Already in PROD)	Ephytos should be sending electronically the Issue Date along with the Time Zone in the XML. Steps: - Issue a PC - Open the PC and click the “View XML” button (if the button does not appear, it should be enabled in the System Settings).  The screenshot shows a web application interface titled 'Review application'. It has a horizontal menu bar with tabs: General, Consignment, Commodities, Attachments, Billing, History, and Hub Tracking. Below the menu, there is a row of action buttons: Back, Print, View XML (circled in red), Withdraw, and Replacement.

	🔧 Open the XML and verify that IssueDateTime is coming with 00:00:00 time and the Time Zone configured in the System Settings. <pre><?xml version="1.0" encoding="UTF-8" standalone="yes"?> <ns3:SPSCertificate xmlns="urn:un:unece:unefact:data:standard:ReusableAggregateBusinessInformationE xmlns:ns2="urn:un:unece:unefact:data:standard:UnqualifiedDataType:21" xmlns:ns3 ="urn:un:unece:unefact:data:standard:SPSCertificate:17"> <ns3:SPSExchangedDocument> <Name>NULL</Name> <ID>PC-XX2024-509S93EJ7N33</ID> <TypeCode>851</TypeCode> <StatusCode>70</StatusCode> <IssueDateTime> <ns2:DateTimeString>2024-12-04T00:00:00+14:00</ns2:DateTimeString> </IssueDateTime> </ns3:SPSExchangedDocument> </ns3:SPSCertificate></pre>
IGN-3279	Submitted bill note to be modified. Steps: 🔧 As NPPO Admin check the configuration named “Enable eBilling for certificates” and enable it. 🔧 As NPPO Assistant or Company User create a Certificate Request and submit it 🔧 As NPPO Inspector go to the “Billing” tab 🔧 Select a Bill entry and submit the bill. 🔧 Upon submission there is a note saying Submitted bill date and sent notification date to exporter: 04-12-2024 
IGN-3333	Non-active Users should not be able to reset the password.

3 User Manuals

Reference	Description
