</tr>
</thead>
<tbody>
<tr>
<td>IGN-1651</td>
<td>[USER FEEDBACK] Provide the possibility to upload multiple commodities. Please check the Annex with further details (Annex – Offline commodity upload feature)</td>
</tr>
<tr>
<td>IGN-1904</td>
<td>[MG USER FEEDBACK] Add a tooltip for the “Applicant” field displayed to the NPPO Assistant at time of CR creation.</td>
</tr>
</tbody>
</table>
UN/LOCODE to be selected as *Point of entry*. Ref. [https://unece.org/trade/cefact/unlocode-code-list-country-and-territory](https://unece.org/trade/cefact/unlocode-code-list-country-and-territory)

The user should be able to type or select the *Point of entry*. The GeNS will send electronically the related UN/LOCODE.

**Declared point of entry – Country**
- This is a mandatory field
- By default, this is equal to the “Name of importing country” in the “General” tab and to the “Consignee name” in the “Consignment” tab.

**Declared point of entry – Port and other locations**
- This is a non-mandatory field. You can also leave it blank.
- You can type the first 4 characters of the location within the above selected country. E.g., type “Seat” to select “Seattle” from the drop-down list. “Seattle” will be displayed as option if the “United States of America” is selected as country in the above list.

---

**IGN-1979**
(See also IGN-2474 and IGN-2546)

---

**IGN-2340**
The “HUB Tracking Info” tab should display the following message for Paper Phytosanitary Certificates:
- English instance→ The country is not registered or not enabled to receive electronic Phytosanitary Certificates in the HUB
- French instance → Le pays n’est pas enregistré ou n’a pas la possibilité de recevoir des certificats phytosanitaires électroniques dans le HUB.

<table>
<thead>
<tr>
<th>IGN-2365</th>
<th>When creating a new item in the Reference Data there should be a limit of digits for the code (e.g., a new “Condition” can have a “Code” with max. 4 digits/characters).</th>
</tr>
</thead>
</table>

| IGN-2420 | Optimization of the saving of the exporters and consignee within the Company configuration for the NPPO Admin.  
**Steps:**  
- As NPPO Admin assign several exporters and consignees to a given Company  
- Create and issue a PC as Company User using the different exporters and consignees |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| IGN-2474 | [UN/LOCODE] Create a section under Reference Data to display the UN/LOCODE according to [https://unece.org/trade/cefact/unlocode-code-list-country-and-territory](https://unece.org/trade/cefact/unlocode-code-list-country-and-territory). The full location code is the composition of the country code + the location as per UN/LOCODE.  
- Section visible to the NPPO Admin  
- Click Reference Data > UN LOCODE  
- No results displayed upfront  
- Select the “Country” from the relevant drop-down field. |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
Then, you can use the “Search” bar to refine the results within a given country. Select the result and click “Edit” or double click the result to edit. The full code will be displayed (country code + location code). You can edit the name of the record if you wish. You can disable the record if you wish this not to be selected as “Declared point of entry” within the CR “Consignment” tab.

1. E.g., type “Seattle” to refine your search within the US country.
2. Then, select your result and click “Edit”.
3. You will see the full code. E.g., Seattle code is USSEA.
4. Type a different name if you wish.
5. Uncheck the box if you wish to hide it as “Declared point of entry” within the “Consignment” tab of the Certificate Request.
6. Click “Save” to apply your changes.

IGN-2496 [GT USER FEEDBACK] The NPPO name should not hide the QR code upon issuance.
IGN-2524 Enhancement of the notifications sent to the NPPO Inspectors for CRs with “Pending Review” status.
Send notifications only for Certificate Requests that have been in “Pending Review” status from 14 days prior to today (not from the beginning of the time).

The NPPO Admin can still configure the maximum number of days to wait before sending notifications to the NPPO Inspectors.
For example, today it’s 9-Nov-2022.
The NPPO Admin set the Pending Notification Days configuration to 1 day (see pic). The NPPO Inspectors should receive a notification with subject “ePhyto National System - Certificates awaiting inspection” for all NPPO Offices assigned to his/her profile for CRs in “Pending Review” status from 27-Oct-22 (14 days prior to today) until 8-Nov-22 (1 day prior to today).

IGN-2544 Public search of a Phytosanitary Certificate on login page (no credentials needed).
Steps:
- Click “Search for a Phytosanitary Certificate” button on login page
Type the Certificate Number, Place of issue and Date of issue in the allocated mandatory fields.

Please note that no search is available for Certificate Requests (e.g., Drafts). Only Phytosanitary Certificates can be found (e.g., Issued).

Complete the reCAPTCHA validation

Click “Search”

1. Type your outgoing PC number.
2. Type your Place of issue (NPPO Office).
3. Select the PC Date of issue.

4. Once the ReCaptcha verification is done, click “Search”

Click “Download”.

Click the “Download” button once it is displayed. The PC printout will be displayed at the bottom of your web page.

IGN-2546 Create a warning message when the “Country of Consignee” gets changed.

Steps:

- Create a CR
- Select the “Name of importing country” (e.g., United States of America - US)
- Automatically the system will populate the “Country of Consignee” and the “Point of entry” with the same country in the “Consignment” tab
- Change the “Country of consignee”, e.g., select Italy – IT
- A pop-up message should be displayed to the user to inform about the difference between the “Country of consignee” and the “Declared point of entry”.
Click "OK" to acknowledge the message
The user can decide to keep them different

or to change the “Declared point of entry” selection to be equal to the “Country of consignee”

IGN-2558 [PA USER FEEDBACK] “Distinguishing Marks” column to be included also in the “View” list, same as on the import side. Please note that the column will display the “Distinguishing Marks” at document level (not a trade line level),

IGN-2597 improvement of the attachment received at import level
### 3 User Manuals
